

# Cables for Medical Devices

## Biocompatible hybrid cable

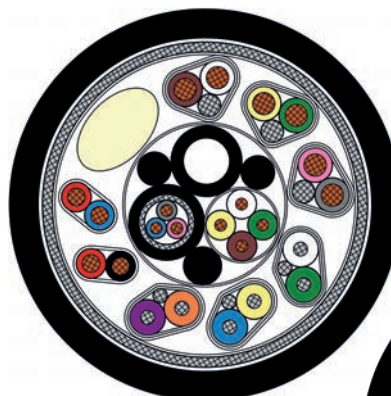

Cables for Cosmetic Procedures

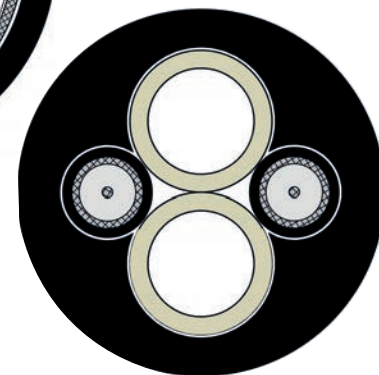

### COSMETIC PROCEDURES

Imaging systems for medical diagnostics require reliable connections for transmission. SAB Bröckses offers a variety of possibilities to fulfill your demands. SAB's strength is in providing innovative customized solutions whether hybrid cables with COAX elements or electrically shielded products with permanently flexible properties - we can produce from as little as 100 m.

example  
configurations

#### Construction:

Conductor:	finely-stranded
Insulation:	SABIX®
Stranding:	hybrid combination with different tubes
Shielding:	highly-efficient tinned or silver copper braid
Jacket:	PU

#### Outstanding features:

- customized
- prototypes

#### Technical data:

Voltage:	up to 375 V
Testing voltage:	selection test acc. to 2 MOP
Temperature range:	-40°C/+80°C
Cleaning:	standard wipe disinfection
Surface:	non-sticky
Application:	mechanically sophisticated, cross-pressure stable
